

All students at Bay Path have a network account using Microsoft 365 and will use this login to gain access to the Bay Path network. With this account, students can install Microsoft Office on up to 5 personal devices. The account login is their **first initial followed by a period then their last name**. Their password is the word **“Student” followed by their student ID number**. Some instances require the use of the student’s middle initial if there are two students with the same first and last names. If any student has trouble logging in, please see the Technology Director for assistance.

**An example login would be as follows:**

User Name: [a.adams@baypath.net](mailto:a.adams@baypath.net)

password: Student1234
